Skills

- Linux, Git (Intermediate - Advanced)

- Python, C/C++, Flask, ExpressJS, Windows, (Intermediate)

- Rust (Beginner)

Language

- Spanish (Native)

- English (Fluent)

- French (Basic)

How I am

I'm a curious being, I like to research and discover new real theories. I have discipline to solve complex problems because I like to challenge myself.

Experiencia laboral

Comau Mexico
7 months

Developer trainee in HR
Developed an internal vacation request system, creating an SRS, Gantt diagram, and UI mockups. Managed employee archives (physical/digital) and handled documentation for new hires.

Proyectos universitarios

Algorift Project

Backend developer
Developed a coding-themed 2D Unity game for kids, embedded in a full-stack web app using ExpressJS. Focused on engagement, error handling, and usability. The goal was to engage non-programmers and inspire them to explore coding through gameplay.

Dif+ App

Backend developer and leader
Led a 10-week, four-member team to develop two mobile apps and a web app for DIF. Solutions optimized client registration, QR sign-in, and admin control, all integrated with an AWS RDS database and Flask backend.

Proyectos personales

Zenion Linux

Main developer
Still a mock up/prototipe, Zenion LInux will be a independent Linux distribution that follows the to-do-yourself principle with some out-of-the-box options

Ramskit

Main developer
Ramskit is a CLI tool for data encryption/decryption, enabling secure processing via Shell/Bash.
